## Book Synopsis

In this book is a true story about an aggressive and conniving adult bully, and the years of consequences that followed his workplace bullying. Are you working in a hostile working environment? Do you have to put up with hostile co-workers or managers? Do you witness cover-ups and notice a secret agenda going on by some of your teammates where they are manipulative, distrustful, misgiving, and deceptive, creating undue stress with a constant barrage of bullying and harassment in the work place? Are you the bully's main target? This is an excellent book exposing the business world's darkest, and best kept secrets around. Targeted Exposed is a true story about a man whose life and career became ruined by a very aggressive workplace bully, who used deformation of character, a lot of hostility, and made any company he was working for or visiting at into a hostile work environment. This not only created a lot of emotion and undue stress to his victim, but also to all the witnesses he came in contact with as well. This book documents what a horrific and destructive bully, who first acted as Bob's best friend and then later suddenly turned on him in the office where he worked. Out of no fault of Bob, the bully began his reign of terror in the workplace back in 2005. He continued with his bullying tactics, defaming Bob, every chance he got, to the point where Bob lost his last job in Pittsburgh Pennsylvania in January 2013. This bully actually kept tabs on Bob, following him as he worked around the country, doing his bullying, defamation of character, and other harassment techniques in several job locations, where Bob found work. This is the behavior of a very sick man. That's why Bob calls him a "pathological serial work place bully". Since his Pittsburgh experience, Bob had decided to go on an anti-bully crusade to help others who are currently being bullied in the work place. Bullying is horrible. Adult bullying is much worse, especially in the work place. In many companies workplace politics even allow this to happen and the management continues to cover up this hostile behavior. They need to pull their head out of their butts and make this behavior strictly forbidden, and ensure its banned, and most important condemn and punish those bullies once and for all. No one talks about it or even admits that bullying even exists, but it does. And those who are victimized by this behavior are all good

employees who end up either finding work elsewhere, or being terminated. The business world needs to put "STOP BULLYING" as one of their main slogans for their workplace. Bullying ruins lives and in some cases, even kills. So wake up corporate world and realize what you are allowing is simply wrong. There are ways to stop bullying. In Bob's book, he gives the reader many suggestions to help those who are being bullied in school as well as in the workplace. He also discusses as to what all the witnesses should do to help put a swift end to such workplace harassment. These are ways to stop a bully in their tracks and they are discussed in this book. Workplace bullying devastates the lives, careers, and families of millions. In this completely updated new edition, Bob added back in the names and locations of the companies where the bullying actually took place. The names have been changed to protect both the innocent and the guilty. Bob's anti-bully campaign is continuing to grow where he focuses on giving advice and support to others targeted with Workplace Bullying. Bob's web site: [www.bullyproofnetwork.com](http://www.bullyproofnetwork.com) is filled with bullying information and several links to where the victim can go to for the much needed help and support they need. When searching the internet, you will find many bullying stories and bullying facts. Bob's story is amazing and its really unbelievable that he lived through it. Currently, Bob also works with other anti-bullying organizations, which help our children who are being bullied your schools.
